Letter of Recommendation – RB Engineers, Inc.

To Whom It May Concern:

I would like to take this opportunity to strongly recommend RB Engineers. I have worked with Ross Baharmast extensively for the past 18 years. Throughout this time frame I was responsible for product development at Centex & Cambria Homes and currently now at Oakpointe Builders, LLC. While working at these companies, I managed the development of numerous home plans ranging from small cottages to large complex homes. With RB Engineer's expertise, we designed in flexibility to accommodate both flat and steep lots, as well as pre-approved engineering alternates based upon site conditions.

RB Engineers' knowledge of both sound engineering principles and construction practices has enabled them to "engineer" construction friendly plans that are simple to build and cost effective. Further, both Ross and the staff at RB Engineers have always made themselves for both field personnel or building officials, responding in a timely and thorough manner.

With pleasure, I highly recommend RB Engineers for their professionalism, cost effective engineering approach, and supportive client relationship.

Sincerely,

A handwritten signature in cursive script that reads "Doug Duncanson".
